**Bio:**  
As a physician, I strongly believe that we need better and more advanced therapies to treat cancer, but I also feel it is very important to carefully tailor the treatment to the individual patient. There is an increasing array of options for treatment for cancer including chemotherapy, targeted therapies, surgery and radiation and many patients need a combined and coordinated strategy that may include several of these options to achieve the optimal results. We have excellent surgeons and radiation therapists at UC San Diego Healthcare and we work closely as a team to provide the best possible care for our patients.

Bio:
As a physician, I strongly believe that we need better and more advanced therapies to treat cancer, but I also feel it is very important to carefully tailor the treatment to the individual patient. There is an increasing array of options for treatment for cancer including chemotherapy, targeted therapies, surgery and radiation and many patients need a combined and coordinated strategy that may include several of these options to achieve the optimal results. We have excellent surgeons and radiation therapists at UC San Diego Healthcare and we work closely as a team to provide the best possible care for our patients.

who specializes in lead management. Pacemakers and implantable
cardioverter-defibrillators (ICDs) deliver energy to the heart through thin,
flexible wires called leads. When these leads are not working properly –
because of infection, damage, or surrounding scar tissue – they need to be
removed. Dr. Pretorius performs a minimally invasive procedure called laser
lead extraction to cut through scar tissue surrounding the lead, allowing it to
be easily removed.

Bio:
As a physician, I strongly believe that we need better and more advanced therapies to treat cancer, but I also feel it is very important to carefully tailor the treatment to the individual patient. There is an increasing array of options for treatment for cancer including chemotherapy, targeted therapies, surgery and radiation and many patients need a combined and coordinated strategy that may include several of these options to achieve the optimal results. We have excellent surgeons and radiation therapists at UC San Diego Healthcare and we work closely as a team to provide the best possible care for our patients.

Bio:
Paul T. Fanta, MD, is a board-certified medical oncologist who specializes in treating gastrointestinal cancers. Because the diagnosis and management of gastrointestinal cancers has dramatically changed in the past several years, his research interests include how to incorporate biotechnology, bioinformatics, molecular analyses and pharmacogenomic data in the setting of prospective clinical trials—with the results of better identifying patients who will benefit from chemotherapy, avoiding toxicities from treatment, and developing a predictive therapeutic strategy unique to a patient's disease.

Dr. Brown is world renown for his contributions to basic and clinical research of the cornea, and has many “firsts.” He was the first to initiate studies into the surface characteristics of the component of the pre-corneal tear film, was the first to implicate that collagenase was responsible for corneal ulcers after alkali burn, and was the first to develop a collagen research laboratory for the eye and to initiate biochemical and cell biological studies on the structural macromolecules of the cornea. Dr. Brown was also the first to show that severely alkali-burned cornea can be successfully transplanted, resulting in many patients across the world to see whereas this was once considered a hopeless condition. Over thirty years ago, he developed corneal transplantation in babies born blind from corneal opacities. Since few surgeons in the world feel comfortable with this complicated procedure, infants and children from all over the world come to Shiley Eye Institute for their care.

**Bio:**
In 1996, Dr. Goldbaum published a report on the first known case of a newborn with E-Coli Endophthalmitis, resulting in inflammation of the internal structures of the tissues in the eyeball. Dr. Goldbaum’s breakthrough in treatment for macular hole was featured in 1998 issues of Ocular Surgery News and the journal, Ophthalmology. The technique using silicone oil has the potential of greatly altering the treatment of macular holes worldwide.

Victor (Gert) Pretorius, MBChB, is a board-certified cardiothoracic surgeon who specializes in lead management. Pacemakers and implantable cardioverter-defibrillators (ICDs) deliver energy to the heart through thin, flexible wires called leads. When these leads are not working properly – because of infection, damage, or surrounding scar tissue – they need to be removed. Dr. Pretorius performs a minimally invasive procedure called laser lead extraction to cut through scar tissue surrounding the lead, allowing it to be easily removed.
