Medical Oncology

Medical oncology focuses on the diagnosis and treatment of all types of cancer and other benign and malignant tumors. Medical oncologists administer therapy for these malignancies and collaborate with surgical and radiation oncologists to provide cancer treatments. Bio:
Paul T. Fanta, MD, is a board-certified medical oncologist who specializes in treating gastrointestinal cancers. Because the diagnosis and management of gastrointestinal cancers has dramatically changed in the past several years, his research interests include how to incorporate biotechnology, bioinformatics, molecular analyses and pharmacogenomic data in the setting of prospective clinical trials—with the results of better identifying patients who will benefit from chemotherapy, avoiding toxicities from treatment, and developing a predictive therapeutic strategy unique to a patient's disease.
