Blood & Marrow Transplant - BMT

A blood and marrow transplant (BMT) is an infusion of adult stem cells — a BMT is used to replace bone marrow that has been destroyed by disease, chemotherapy or radiation. Learn more about blood and marrow transplant at UC San Diego Health.

Edward (Ted) Ball, MD
Director, Blood and Marrow Transplant Program
Professor of Medicine

Bio:
Edward "Ted" Ball, MD, is a board-certified hematologist and medical oncologist who treats individuals with blood-related cancers such as leukemia and lymphoma. In his role as director and chief of the UC San Diego Health / Sharp HealthCare Blood and Marrow Transplantation (BMT) Program, he leads an interdisciplinary team of physicians, advanced practitioners, nurses, social workers and support staff. Dr. Ball offers chimeric antigen receptor (CAR) T-cell therapy to adults with relapsed or refractory B-cell lymphoma, a type of non-Hodgkin lymphoma. CAR T-cell therapy harnesses the patient’s own immune cells to recognize and kill cancer cells. It is just one of many types of personalized cancer therapies offered at UC San Diego Health.

Bio:
Joel M. Baumgartner, MD, is a surgical oncologist with expertise in treating cancers of the gastrointestinal (GI) tract. He treats tumors that have metastasized to the abdomen, using treatment known as the “chemo bath” or hyperthermic (heated) intraperitoneal chemotherapy (HIPEC). This treatment involves surgical resection of all tumors followed by circulation of heated chemotherapy throughout the abdomen. This technique avoids many of the toxicities associated with systemic chemotherapy, while exposing the abdomen to higher concentrations of chemotherapy.

**Bio:**  
As a physician, I strongly believe that we need better and more advanced therapies to treat cancer, but I also feel it is very important to carefully tailor the treatment to the individual patient. There is an increasing array of options for treatment for cancer including chemotherapy, targeted therapies, surgery and radiation and many patients need a combined and coordinated strategy that may include several of these options to achieve the optimal results. We have excellent surgeons and radiation therapists at UC San Diego Healthcare and we work closely as a team to provide the best possible care for our patients.

Joel M. Baumgartner, MD, is a surgical oncologist with expertise in treating cancers of the gastrointestinal (GI) tract. He treats tumors that have metastasized to the abdomen, using treatment known as the “chemo bath” or hyperthermic (heated) intraperitoneal chemotherapy (HIPEC). This treatment involves surgical resection of all tumors followed by circulation of heated chemotherapy throughout the abdomen. This technique avoids many of the toxicities associated with systemic chemotherapy, while exposing the abdomen to higher concentrations of chemotherapy.

As a physician, I strongly believe that we need better and more advanced therapies to treat cancer, but I also feel it is very important to carefully tailor the treatment to the individual patient. There is an increasing array of options for treatment for cancer including chemotherapy, targeted therapies, surgery and radiation and many patients need a combined and coordinated strategy that may include several of these options to achieve the optimal results. We have excellent surgeons and radiation therapists at UC San Diego Healthcare and we work closely as a team to provide the best possible care for our patients.

Bio:
In the years I have taught and practiced at UC San Diego (and for a time in the community), I have seen countless improvements in the care of kidney patients. Our understanding of kidney diseases and dialysis management has never been better. At the same time, our ability to prevent kidney transplant failure has markedly improved. We now better understand the risks of living kidney donation. Working with the transplant team at UCSD, and with others across the country, has helped us to successfully address these issues.

Bio:
In the years I have taught and practiced at UC San Diego (and for a time in the community), I have seen countless improvements in the care of kidney patients. Our understanding of kidney diseases and dialysis management has never been better. At the same time, our ability to prevent kidney transplant failure has markedly improved. We now better understand the risks of living kidney donation. Working with the transplant team at UCSD, and with others across the country, has helped us to successfully address these issues.
