Bio:
In the years I have taught and practiced at UC San Diego (and for a time in the community), I have seen countless improvements in the care of kidney patients. Our understanding of kidney diseases and dialysis management has never been better. At the same time, our ability to prevent kidney transplant failure has markedly improved. We now better understand the risks of living kidney donation. Working with the transplant team at UCSD, and with others across the country, has helped us to successfully address these issues.

In the years I have taught and practiced at UC San Diego (and for a time in
the community), I have seen countless improvements in the care of kidney
patients. Our understanding of kidney diseases and dialysis management
has never been better. At the same time, our ability to prevent kidney
transplant failure has markedly improved. We now better understand the
risks of living kidney donation. Working with the transplant team at UCSD,
and with others across the country, has helped us to successfully address
these issues.
