UC San Diego Health Physician Directory

Our physicians are recognized leaders in their professional societies, heading national organizations and committees dedicated to improving care and advancing knowledge about disease. They are prominently listed in publications such as America’s Top Doctors and *U.S. News & World Report*’s rankings of outstanding physicians and clinical programs.

Patient Access

Request an Appointment
Whether you’re looking for a primary care physician (PCP), need a specialist for treatment or are seeking a second opinion, you can make an appointment by following the steps below:

→ **New Patients (who have never seen a UC San Diego Health provider)**
  To register as a new patient and schedule an appointment, call **800-926-8273**, Monday through Friday, 8 a.m. to 5 p.m.

→ **Current Patients**
  Contact your physician’s office directly to schedule an appointment or call the main switchboard number, **858-657-7000**, and ask to be transferred to your physician’s office.

→ **Find a Doctor**
  To use our physician search website to find a physician by name or to search for a specialist, visit: [doctors.ucsd.edu](http://doctors.ucsd.edu).

Referring Physician Access

Transfer a Patient
For hospital-to-hospital transfers, call **619-543-5709** (24-hour service) for instructions or to speak to a transfer coordinator.

Consultations
If you need to talk with one of our physicians about a case or if you have any problems or concerns, please contact us at **855-543-0555** from 8 a.m. to 5 p.m. We want to hear from you.

Refer Your Patient
Call Physician Access at **855-543-0555** or fax **888-539-8781** and our team will register and schedule your referred patient. You will receive follow-up communication (consultation notes, discharges, etc.), as well as access to our electronic medical record system, UCSD Link.

Our laboratory focuses on the role that microbial communities play in human homeostasis, health and disease. We firmly believe that the various microbial components of human ecosystems including bacteria, viruses, archaea, and fungi are important factors that help determine the natural history of their hosts. Furthermore, their interactions with humans or their interactions with other microbial constituents in these communities likely have consequences for human health.
