Bio:
Joel M. Baumgartner, MD, is a surgical oncologist with expertise in treating cancers of the gastrointestinal (GI) tract. He treats tumors that have metastasized to the abdomen, using treatment known as the “chemo bath” or hyperthermic (heated) intraperitoneal chemotherapy (HIPEC). This treatment involves surgical resection of all tumors followed by circulation of heated chemotherapy throughout the abdomen. This technique avoids many of the toxicities associated with systemic chemotherapy, while exposing the abdomen to higher concentrations of chemotherapy.
